

## fi-4860C Image Scanner

### TECHNICAL SPECIFICATIONS

The fi-4860C image scanner (Ultra Wide SCSI interface) offers high speed, duplex color scanning capabilities. Fujitsu is proud of these excellent features, which will ensure this product is used well into the future.

- Most efficient in color/duplex scanning: Scanning speed is steadily high 60ppm/120ipm (A4, 150dpi/200dpi) regardless of color/grayscale/binary, or simplex/duplex documents.
- Superior paper transport function: ADF function minimizes paper double-feed and mispicks.
- CCD (Charge Coupled Device): CCD image sensor has accelerated scanning speed, and realized simultaneous duplex, high-resolution scanning. Now, users can overcome massive filing task.
- Imprinter fi-486PRFR (Front)

- Imprinter fi-486PRRE (Rear)

Note: Imprinter is the device for recognizing scanned documents by imprinting numbers on each document. fi-486PRFR enables users to store image data with imprint numbers on.
